INVENTOR : KAWAKAMI OSAMU;

INT.CL. : G11B 27/00

TITLE : REPRODUCING DEVICE

ABSTRACT : PURPOSE: To easily select a music according to a music image by using a recorded recording medium as the directory information of key word information relating to the music image, selecting and reproducing the music coinciding with the desired music image by a key word designating means.

CONSTITUTION: In a compact disk CD1, music data is recorded on a track together with a synchronizing signal, a sub-coding and an error correcting code. When the CD1 is set to read in reproduce by an access signal from a CPU 5 by an access circuit 4 and a reproducing circuit 6, the sub-coding is read and stored in a first memory 13. Seasonal feeling is read from a current data by a clock IC 19 and an ambient atmosphere is read from a time and a sensor 26 to select from the directory information of the memory 13, the music having the key word information for which they are automatically inputted and the key word information manually inputted from an operating part 15 and stand by. At the time of reproducing, the selection of the reproduced music is recognized to reproduce an object music. Thereby, the music is easily selected according to the music image.
